# Modelling humanities data with TEI-XML
Scholarly editing and manuscript cataloguing in the digital age
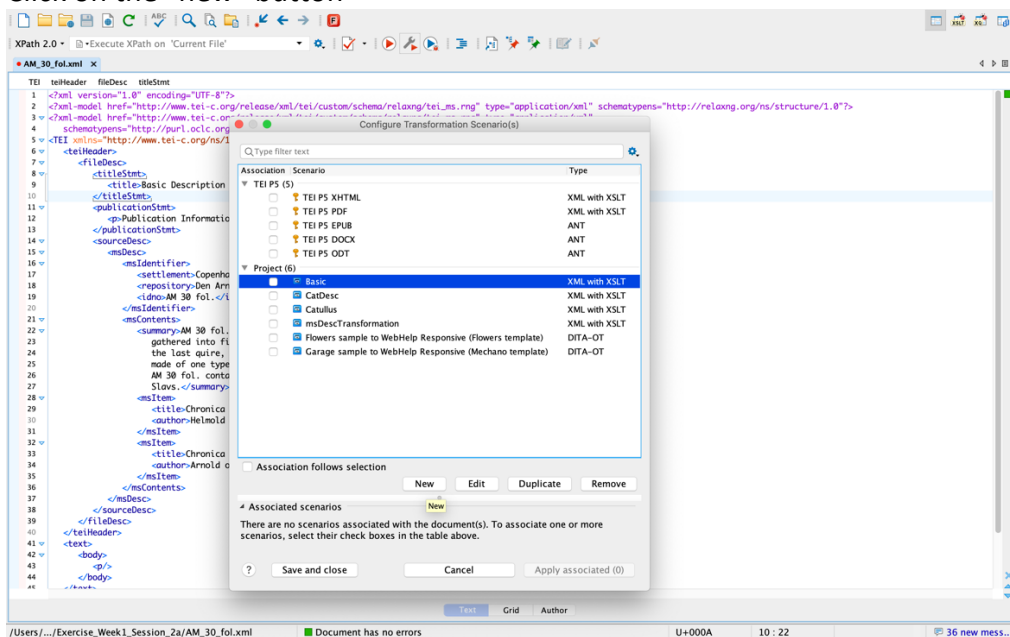

Dr Katarzyna Anna Kapitan (katarzyna.kapitan@chartes.psl.eu)
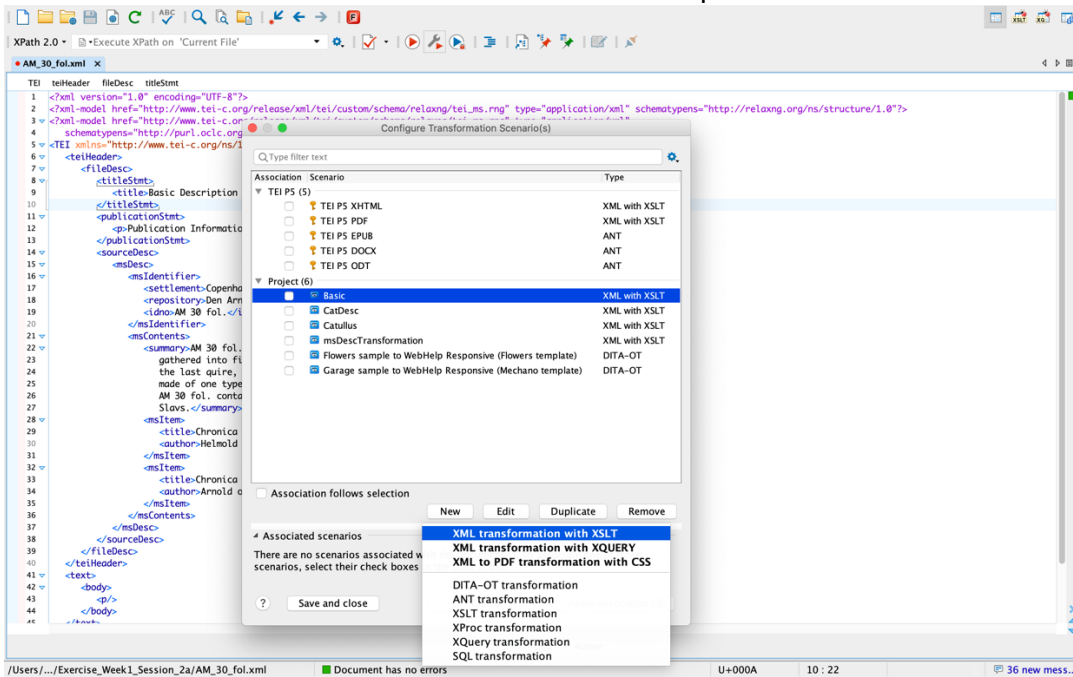

TRANSFORMATION SCENARIO

1. Open the xml file you want to transform in the Oxygen Editor
2. Click on the wrench with a red arrow in the toolbar

3. A pop-up window will open
4. Click on the "new" button

5. A drop-down menu will open
6. Choose the "XML transformation with XSLT" option

7. A new pop-up window will open
8. By the field XSL URL click on the browsing icon

9. Select the location of your XSLT
10. Click on the "Output" button

11. Tick the "Save as" option and type the name of your output file: out.html

12. Tick the "Open in Browser" option
13. Click OK

14. Now you are back to the first pop-up window
15. Tick the transformation scenario you've just created
16. Click "Apply associated"
17. A new html file will appear in your folder and its contents will be displayed in the browser
